

December 28, 2009

Dear Resident:

RE: Department of Homeland Security's Federal Emergency Management Agency's (FEMA) National Flood Insurance Program (NFIP) Maps

Fort Bend County Municipal Utility District No. 25 (the "District") would like to take this opportunity to inform you that FEMA has developed its preliminary Digital Flood Insurance Rate Maps (DFIRM) for portions of Fort Bend County, Texas. The DFIRM is FEMA's efforts to update flood hazard maps so that they accurately reflect current flood risks. To learn more on how the preliminary DFIRM's affect your area, the District would encourage you to do the following:

1. Visit the Fort Bend County Drainage District's website, <http://fbcmmap.co.fort-bend.tx.us/floodplainmap/>, to use their interactive mapping tool and determine how your area is affected by the preliminary DFIRMs.
2. Attend one of the six scheduled "Flood Insurance Mapping Workshops" listed on the back of this letter. The Workshops are being held to introduce the DFIRMs and the adoption process to the public and to provide the public an opportunity to review the DFIRMs.
3. Contact your insurance agent to discuss the preliminary DFIRMs and how it affects your area. The District suggests that you discuss the benefits of purchasing flood hazard insurance now versus at a later date.

The District encourages its residents to evaluate all of their options regarding these preliminary flood hazard maps.

If you have any questions about the preliminary maps, please contact a representative listed on the Fort Bend County Drainage District's website, http://fbcmmap.co.fort-bend.tx.us/floodplainmap/index_files/Page397.htm.

Very truly yours,

Fort Bend County M.U.D. No. 25
